RE: 18-7633 BACKORDER RELEASE

Sierra has made manufacturing updates to the 18-7633 MerCruiser Trim Sender and Limit Kit and is now shipping backordered kits.

The improvements are outlined below and are a result of Sierra's continuing efforts to provide only "The Very Best Parts of Boating".

The following areas have been updated:

- Housing seal has been improved.
- Both high and low pressure vacuum testing is being performed to ensure a proper seal and to prevent water intrusion.
- Laser etched arrow on housing allows for easier and quicker indexing alignment.
- Date coding on the rear of the units for improved lot traceability and quality assurance.
